

Digital signage
for hotels

More than a thousand words

We custom design your digital signage solution to connect with your customers. Free, fresh and adapted to your business.

Make your hotel more attractive

Take advantage of the powerful visual impact of Hermes.

Quality of experience

We highlight your content without invading, with subtlety.

Monetise your services

Not a single customer without knowing what you can do for them.

Tell us about your challenge

Do you have meeting rooms, commercial areas, information points, lifts? Let's work together on where and how to make an impact.

Surely you need something special

Our philosophy is to adapt the hotel's digital signage to your requirements, not the other way around. We design with you and for you, to give your business a boost where only you know how.
